NDG Introduction to Linux II Frequently Asked Questions

Instructors and Administrators

Last updated October 2015

The NDG Introduction to Linux II course was developed by the Network Development Group (NDG) to take advantage of the flexibility and course management capabilities in the Cisco NetSpace™ learning environment.

NDG Introduction to Linux II Curriculum

1. Who is sponsoring the course?

NDG has developed the NDG Introduction to Linux II course for learners and institutions participating in the Cisco Networking Academy® program. NDG is offering this course to instructors participating in the Cisco Networking Academy at no cost. This no cost access is to help instructors prepare learners for the LPI LPIC-1 certification exams. NDG reserves the right to charge instructors if the “for free” access is abused by the academic community participating in the Cisco Networking Academy. Learners will be charged a fee.

2. How much is the fee for the NDG Introduction to Linux II course?

NDG Introduction to Linux II is free to instructors. The fee per learner is \$39.95.

3. Why is NDG charging a fee?

The fee is to sustain the cost of Linux course offerings, virtual machines and support.

4. Is there a discount?

The fee is discounted 50% or more off the commercial retail price.

5. Are bulk purchase discounts offered?

No, there are no bulk purchase discounts. The course is already discounted based on the buying power of the Cisco Networking Academy.

6. How long is the course access?

The NetSpace course start and end date is controlled by the institution. The NDG Introduction to Linux II maximum availability is six months (per \$39.95 fee). Course access is set to a maximum of six months. At the end of the maximum six months, learners will be required to enter a new access code. An additional six months of access can be purchased if desired.

7. How is the course purchased?

Academic institutions can purchase on behalf of learners or to resell at the academic institution's bookstore. Learners can also purchase the course directly. To learn more about purchase options, please refer to: http://www.netdevgroup.com/content/lpi/documentation/NDG_Linux_Courses_Overview.pdf

8. What is the refund policy?

Refunds are available for up to two weeks after purchase for learners that have utilized less than 30% of the course content.

9. How can I request a refund?

Step 1: Find the email receipt you received from fastspring.com when you purchased course access. Identify the “order number” listed on the email from fastspring.com.

Step 2: Email hostedsupport@netdevgroup.com with subject “Refund request”. List the order number and course access code or codes for which you are requesting a refund. **Please note, each listed course access code will be disabled upon refund approval.** Briefly describe your reason for requesting a refund.

Step 3: Once approved, your refund request will be processed by fastspring.com.

10. What jobs align with this course?

Knowledge of Linux is a helpful skill for a wide variety of careers in business and Information Technology fields. Many emerging and growing career opportunities including big data, cloud computing, cyber security, information systems, networking, programming and software development (to name a few) require basic to advanced knowledge of the Linux command line.

11. What are the course objectives?

The NDG Introduction to Linux II course objectives cover basic skills tested on the LPI LPIC-1 second certification exam including:

- Shells, Scripting and Data Management
- Interfaces and Desktops
- Administrative Tasks
- Essentials System Services
- Network Fundamentals
- Security

12. Does the course align with any industry recognized certification?

The Introduction to Linux II curriculum helps individuals prepare for the [LPI LPIC-1 102 exam](#), the second of two certification exams.

For additional information about the LPI LPIC-1 certification, review the LPI certification website <http://www.lpi.org/linux-certifications>.

Note: This course also aligns to the [CompTIA Linux+ Powered by LPI](#) certification exam. Learners that earn the CompTIA Linux+ certification can receive “the 3-for-1 certification deal” which documents certification for the CompTIA Linux+, LPI LPIC-1 and SUSE CLA certifications. To learn more, visit the [CompTIA website](#).

Course modules aligned to the LPI LPIC-1 102 exam certification objectives are listed on the table below:

Title of Learning Module / Chapter	LPI.ORG LPIC-1 102 Exam Certification Objective
Before You Get Started	Course Introduction
1. Advanced Shell Features	105.1 Customize and use the shell environment
2. Shell Scripts	105.2 Customize or write simple scripts
3. SQL	105.3 SQL data management
4. X Window Components	106.1 Install and configure X11
5. Configuring Display Managers	106.2 Setup a display manager
6. Accessibility	106.3 Accessibility

7. User and Group Accounts	107.1 Manage user and group accounts and related system files
8. Scheduling Jobs	107.2 Automate system administration tasks by scheduling jobs
9. Localization	107.3 Localisation and internationalisation
10. System Time	108.1 Maintain system time
11. Logging	108.2 System logging
12. Email Configuration	108.3 Mail Transfer Agent (MTA) basics
13. Printer Management	108.4 Manage printers and printing
14. Network Fundamentals	109.1 Fundamentals of internet protocols
15. Network Configuration	109.2 Basic network configuration
	109.4 Configure client side DNS
16. Network Troubleshooting	109.3 Basic network troubleshooting
17. Account Security	110.1 Perform security administration tasks
18. Host Security	110.2 Setup host security
19. Encryption	110.3 Securing data with encryption

Note: NDG Introduction to Linux II will repeat some content from NDG Linux Essentials. Why? LPI Linux Essentials certificate and LPI LPIC-1 certification exam objectives overlap. To cover all objectives, topics introduced in NDG Linux Essentials may be repeated in NDG Introduction to Linux II with more in-depth, high-rigor content. For further information, reference:

<http://www.netdevgroup.com/content/lpi/documentation/LPICertobjectives.pdf>

13. Is there an authorized discount for the certification exam?

The Linux Professional Institute offers participants of the Cisco Networking Academy program that enroll in the Introduction to Linux II course a 20% discount on the LPIC-1 102 exam for certification tests taken from Pearson VUE computer based testing.

14. Will participants receive a certificate of completion or letter?

Upon successfully completing the NDG Introduction to Linux II course, each individual is eligible to receive a congratulatory letter from LPI. This letter will document that the individual has completed the NDG Introduction to Linux II course and provide information on requesting a 20% discount off the list price for the certification exam for certification tests taken from Pearson VUE computer based testing. Instructors must mark the student as successfully passing the course to receive the congratulatory letter. For additional assistance, please visit:

http://www.netdevgroup.com/content/lpi/documentation/NDG_Linux_Essentials_Completion_Letter.pdf

15. How do I get access to the Linux course?

If your organization is participating in the Cisco Networking Academy, you can use this course for Instructor Led Training (ILT). You will create a class in NetSpace.

1. **From the NetSpace Home page, select the Teach tab**
2. **Click the Create a Course link**
3. **Enter the course information**

- a. **Select an Academy**
 - b. **Enter a Course Name and Course ID**
 - c. **Select the course Partner: NDG Introduction to Linux II**
 - d. **Choose a language for the course (English only)**
 - e. **Enter a start and conclude date**
 - f. **Select the instructor**
4. **Click Save**
 5. **Follow NetSpace procedures to enroll learners that will be allowed to purchase course access or your institution can purchase and distribute course access codes on behalf of the learner.**

Instructors will have access to the course at no fee. Learner access is by fee. Academic institutions can purchase access for learners or require learners to purchase course access. To review the purchasing processes, please refer to: [NDG Course Access Code Instructions](#)

16. Where can I find more information about how to use NetSpace?

For more information, please visit the NetSpace FAQs and Tutorials web page (you must be logged in to your NetAcad account to access): <https://www.netacad.com/group/program/faqs-and-tutorials>

We also encourage new instructors to complete the Academy Orientation course located in the Cisco NetSpace section in the Global Instructor Resources page (you must be logged in to your NetAcad account to access): <https://www.netacad.com/group/communities/global-instructor-resources>

17. What if my virtual machine is loading slowly?

Please be aware the virtual machines may take an average of 15 to 30 seconds to load. In order to provide the functionality required for some advanced concepts, virtual machines may take a minute or two to load.

18. How long will it take to complete the course?

The course is designed to be taught for a semester or quarter, but academies and instructors are encouraged to use the material based on the needs of the academic institution and students. The NetSpace course start and end date is controlled by the institution. The NDG Introduction to Linux II maximum availability is six months (per \$39.95 fee). Course access is set to a maximum of six months. At the end of the maximum six months, learners will be required to enter a new access code. An additional six months of access can be purchased if desired.

19. What are the computer requirements for the course?

NDG recommends using a desktop operating system (Windows or Mac) with a physical keyboard (for virtual machine access) and one of the following web browsers:

- Google Chrome 30+
- Safari 6.1+
- Mozilla Firefox 25+
- Internet Explorer 10+

20. Do I need any additional equipment for the course?

No additional equipment is required for this course.

21. Is this an instructor led course?

This course is currently available for instructor led training. Learners will benefit from working with instructors who have knowledge of Linux at the LPIC-1 or CompTIA Linux+ level. In the future, NDG plans to release this course for self-paced learners.

22. Is training required for instructors?

No, instructor training is not required for instructors to participate. Instructors are encouraged to attain the LPI.org LPIC-1 certification.

23. Are there any instructor materials or classroom aids available?

Yes, instructors have access to the content, lab exercises, and virtual machines for practice. Each module will have a corresponding PowerPoint slide deck for instructor use. PowerPoint slide decks will be accessible via instructor help and resources.

24. Does the course include assessments?

At the end of each module, questions are presented to the learner as a graded chapter exam. There is also a graded midterm covering chapters one through nine.

For the final exam, instructors can choose between a graded final exam covering chapters ten through nineteen or a graded comprehensive final exam covering all nineteen chapters. . All questions are scored and results are posted in a grade book on NetSpace.

25. How do you enable assessments for this course?

Important: NDG developed the assessment engine for the NDG Introduction to Linux II course. This course does not use the Cisco Networking Academy assessment engine. **The "Activation" link is not used** to enable assessments. To enable assessments, use the following steps:

1. On your instructor account homepage, focus on the menu options located on the left side.
2. Select "**Instructor Resources**".
3. Focus on the "Resources" headline; underneath it, **select the "Assessment Tool" hyperlink.**
4. Next, select the "**Manage Activations**" hyperlink.
5. All of the exams will be listed here. Place a check mark next to the exams that you wish to activate.
6. Once you have selected the exams, click on the "Create Advanced Activations" button.
7. For each exam, you will be presented with options to indicate when you would like to have the exams available, how long a student has to take the exam once initiated, and lastly, how many times the exam can be taken.
8. Once the fields are marked accordingly, click on "Create Advanced Options" to activate.
9. For additional assistance, visit the following URL:
http://www.netdevgroup.com/content/lpi/documentation/NDG_Linux_Essentials_Activating_An_Exam.pdf

Additional Information

26. Where do I get NDG Introduction to Linux II curriculum help?

Learners should direct all content-related questions to the course instructor. Learners and instructors can also use an online tool to submit feedback to NDG for content typos or clarification edits, bugs, or problem instances. When viewing the NDG Introduction to Linux II content, lab exercises, or quizzes, click the Help link in the top right corner to submit a question or report a bug or typo. After submitting a request, the online system will search the frequently asked questions (FAQ) database for an answer. If an answer is not available, the learner will be able to route the submission to NDG for review.

Note: The NDG Introduction to Linux II course is provided by NDG. All questions, comments, and feedback should be directed to NDG. Learners and instructors can submit comments and feedback to NDG using the Help link located in the top-right corner of the NDG Introduction to Linux II content, as highlighted in the screen capture below.

27. Who should I contact if I have questions about this course that are not explained in this document?

All NDG Introduction to Linux II course questions should be directed to Network Development Group at hostedsupport@netdevgroup.com. Please take a few minutes to review the NDG website (www.netdevgroup.com), the course materials and this FAQ document before emailing the NDG staff.
